RE: Notice of *Ex Parte* Communication
*Regarding Promoting Technical Solutions to Combat Contraband
Wireless Device Use in Correctional Facilities- GN Docket 13-111*

Dear Ms. Dortch,

My name is John Fischer. I am the CEO of Try Safety First, Inc. I am submitting this letter to you in accordance with Section 1.1206 of the FCC's rules, 47 C.F.R. § 1.1206. The purpose is to inform you that on Thursday, August 25th 2016, Robert J. Smyjunas (advisor to Try Safety First), Hap Nguyen (engineer for Try Safety First) and myself had two separate meetings with FCC personnel at the FCC location address listed above. In the first meeting, members of the FCC in attendance were David Furth from Public Safety & Homeland Security, Jean Kiddoo, Roger Noel and Moslem Sawez from the Wireless Bureau along with Melissa Conway from the Mobility Division. In the second meeting all FCC members were from the Office of Engineering and Technology consisting of Julius Knapp, Ira Keltz, Bruce Romano, and Walter Johnston.

During the meetings, I demonstrated technology to disable contraband cell phones and I discussed various aspects of our recently released peer reviewed white paper which is attached herein. In particular, we discussed the operational capabilities of the technology and the FCC assistance needed to bring the technology to market.

Should you have any further questions, please call or email me at your convenience.

Regards,

John J. Fischer, CEO
Try Safety First, Inc.
